

Show 10 entries

Will have keyword 1 till 5

Search:

NAME ↑↓	Position ↑↓	Salary	Matching ↓	Keyword 1 ↑↓	Keyword 2 ↑↓	Keyword 3 ↑↓	STATUS ↑↓
Airi	Sales	6000	60 %	3	3	3	-

E-mail a.satou@datatables.net

Resume : Text field here or attachment

Clickable to change status

To Do

- Candidate model -> add email address field
- Job model -> add JD (text area)
- Create a new model called "candidate profile" and foreign key back to candidate model... Use django signal so that once the saved button is pressed, the user profile will be created..
 - Candidate profile
 - matching_results – integer field
 - Keyword 1, 2 ,3,4,5 – integer field
 - Status – (shortlisted, interviewed, hired, not suitable) Default is BLANK
- By default, the number of keywords will be 5, change in the views.py

The above will be the result page

- The result page will call out the candidate data and the candidate profile
